EDEXCEL

ECONOMICS

Pre- Induction tasks 2025

Subject – Economics

Time scale – For first full week of term. This work should take a few hours.

Area to be covered – Economic Measures

Task – Understand measures of the economy

Part 1

Find meanings for the following terms:

- Inflation
- Unemployment
- Economic Growth

Part 2

Find **at least 2** news stories for each term that involve the above topics. The BBC news website is a good source. For each article, highlight the key terms and then write a short summary (one or sentences) explaining what the article is saying in your words. Try to find up-to-date information. Most of these figures are reported monthly.

The Work should be presented as a word document with the meanings to start and then the news articles with the relevant terms highlighted. The news articles should be copied and pasted rather than screen shots (so you can highlight the terms).
