PEARSON A-level Photography

Pre-Induction Task 2026

For your Pre Induction Task, to be completed for your first Photography lesson in September, the **Art Team** would like you to create a **CINEMATIC Selfie**.

There are several examples of photographic Selfies in a cinematic style, please look at the examples on this sheet to get you started.

Cinematic photography often features dramatic lighting, careful composition, and a focus on creating a narrative or emotional impact within a single image, similar to the storytelling and mood-setting techniques seen in movies. It often includes the use of depth of field to isolate subjects, creative angles, and attention to details, textures, and colours to create a visually captivating and storytelling image.

Research the photographers suggested here and explore ideas around the theme to create a series of selfies. You should create a minimum of 25 images and then select ONE as your 'final outcome'.
